High Power & Performance

Powerful Engine MHI S6S-T Engine

The six cylinders turbo-charged engine is built for power, reliability and economy. This engine meets EPA tier III and EU stage IIIA emission regulations.

67.7kW/2,300rpm

State-of-the-art hydraulic system

The latest large-capacity hydraulic system reacts quickly during operation, and a low-noise control valve increases both efficiency and durability.

The new master on the job-site!

Smooth running, efficient and ergonomically designed, 50/60/70DS-7E series are made to meet your needs.

Increased mast tilting angle

The mast tilting angle of 15 degrees forward and 10 degrees backward, the operator can safely and rapidly perform loading and unloading jobs.

Wet disc brake system (Option)

The wet disc brake system is virtually maintenance free and is enclosed to protect from dust and water.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and kick-back.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible through operation of the appropriate control when the operator is not in the normal position. (Option)

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilt it forward and backward, providing the best operational conditions during unloading. When the truck is fully loaded, mast lowering speed is carefully controlled to ensure safety by the down control valve.

Faster travel speed & gradeability

The powerful high-output engine provides greater acceleration, better gradeability and faster travel speed on any tough terrain or slope.

Comfortable Operation

Adjustable steering wheel

Steering wheel with horn button can be adjusted by a lever on the right-hand side for the most comfortable operator position.

Easy and safe shift lever

A single lever on the left side of the steering column gives the operator fast and easy controls of the direction.

Multi-function switch lever

Multi-functional switch lever gives easy access to lights and horn.

Quick response of operating control levers

Only minimal operator's effort is required for precise, safe and productive control.

Ergonomically designed with the operator in mind!

A design based on human engineering relieves fatigue and increases operator's efficiency.

■ Some of the photos may include optional equipment.

Ergonomically positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for convenience while operating the equipment.

Cup holder & console box

Additional storage spaces are located inside the operating space for operator's convenience.

New high visibility for safe operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

- Asymmetrical Backrest
- Movable Armrests
- Seat Heating
- Practical Document Box

Full floating overhead guard mount

The anti-vibration rubber is installed between the guard and truck frame to reduce the source of vibration and noise while driving. This not only reduces operator's fatigue but also increases safety.

Endurance & Safety

Strong overhead guard

The safety overhead guard exceeds EEC and ANSI regulations and protects the operator during hazardous jobs.

Parking brake

Toggle type parking brake requires less efforts from the operator to set.

Ground clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect expansive components during operation on rugged surface.

Highly durable split type drive axle

Powershift transmission provides fast travel speed and quiet travel under any heavy load condition, and boosts work efficiency.

Enhanced safety through high durability!

Safety and durability are priorities in the design of the equipment.

■ Some of the photos may include optional equipment.

Large footboard & hand grip

Wide "open" step offers convenience and safety when entering and exiting truck.

Heavy duty single unit frame

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

Easy access of electrical Components

Various electric parts are centralized in dash board resulting in improvement in maintenance.

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system and also extends the life cycle of exhaust gas system.

Fuel tank safety valve

Integrated safety check valve shuts off fuel supply in the unlikely condition of a truck overturn.

Bright, protected headlights and rear working light

Bright, protected headlights and rear working light are positioned for exceptional visibility.

Electrically monitored air filter
Air cleaner sensor alerts the operator of a restricted air filter and allows replacement before damage.

Visible pre-cleaner
Efficient, accessible pre-cleaner provides for longer engine life.

Brake fluid reservoir
Highly visible, easily accessible reservoir makes for quicker daily inspections.

An accessible, compact fuse box for easy inspection

Centralized design for easy service!

An ideal arrangement of component parts ensures easy accesses and conveniences for the maintenance.

Battery master switch

Key-locking fuel cap with air vent

Automatic self locking gas spring
Engine compartment hood is held safely open by a self locking gas spring.

Large tool box
Additional tool box located in machine side for operator's convenience.

Easy change air cleaner
The air filter is readily accessible for cleaning or replacement.
